with the discussion in this case, which we pass by, believing that enough has already been adduced to prove, beyond a doubt, that the decision Was orroneous. We now proceed to state and defend our own

hypothesis. It is distinctly this: BESJ. LETT died of the effects of Nux Vomica, or its active principle, Strychnine, the effects of which are similar. To set this matter in the clearest light, it is only necessary to present the symptoms and effects of this drug, and compare them with parties present were Drs. Octon and Radman, and a brother of the latter.

This temporarily closed the exhibition; but an hour afterward, as: Dr. Orton was entering his house, he sencountered a thigh bone, eighteen inches iong, which came down with such foace as to knock an apple out of his hand. Soon ofter the tibia was thrown, which concluded the programme. The actual time which he has spent in the work is stated to be eighteen hours—not as soon to be sure, as they might have been brought on the case—but all things considered, we think the ghost has made good time,—N. Y. Evening Post, 7th back of the whole spine into an arch, and con vulsive movements of the limbs. Most persons are familiar with its effects on dogs. In the same manner it affects the muscles of respiration partakes of the paralysis, and gradually ceases to perform its functions. Now, look atassome of the more prominent symptoms, which naturally result from this paralyzed condition of the muscles. From paralysis of the muscles of the throat results great difficulty or im-

Paralysis of the respiratory organs necthe Court House, &c., they satisfy themselves esserily produces slow, difficult breathing, which is mostly effected by the abdominal muscles, insteed or the rising and falling of the ribs and chest. The general paralyris produces a less of state of beiplereness. The brain is usually but little effected, and consciousness is retained .--Vomiting is often produced at an early stage of its action. Mucus accumulates in the wind pipe and broncois, producing a rattling, simulating the "death rattle," and from the same cause, viz:

> Now what is the history of the case of Mr. Larr? The first account we have of his illness is that he had opisthotonos and general violent and frightful convulsions, and vomiting of green billious matter. The convulsions of some muscles continued to within 24 hours of death. to general paralysis. It was swident that he re tained his consciousness to the last. He had no fever and no unnatural acceleration of the pulse. He had no cough or expectoration, nor quick breathing, nor any other distinguishing symptom of pnsumonia ... Will any one pretend that the symptoms present a picture of pac monia? But re assert that they do present a complete and perfect picture of poisoning by such a doze, or doses, of strychnine as are not quite sufficient to destroy life, during the first stage of their action -the convulsive stage but quite sofficient to be fatal during the next or paralytic stage. Let it be remembered that these symptoms occurred suddenly in a man remarkable for his physical health and energy. ! We assert that every symptom of his disease is in perfect harmony with the hypothesis of strychnine poison, but perfectly irreconcliable with that of pneumonis or any other known natural disorder. A theory is said to be perfect when it explains all the phenomena to which it relates, and especially if these phonomena are not applicable on any other theory. If so, our theory is perfect as far as the symp

But how does it harmonize with the post mortem appearances? If it fails to account for these appearances in a satisfactory manner, then it is untenable. We have already shown that the lungs were not hepatized. What was their pathological condition? We answer, it was a state of general and pro found congestion of the lungs. The following is a description of congested long from a high medical authority. "The affected portion of lung is of a deep rad color, crepitates under pressure, though less than in health, retains the impression of the finger, and | 50 to Mrs. Annexes of for the delicious ices which when out, exudes conjourly, a bloody, turbid, and she so liberally contributed during the two days somewhat frothy scam. The condition, altogether, very much resembles the machanical congestion occasioned by the gravitation of blood after death.

or at the very close of life." This is the accurate and exact description o in appoarance, and may be easily confounded with it by a superficial or careless observer .-But if one has not the discrimination to make the distinction otherwise, it may be instantly made by dropping portions of the lung in water in the one case it sinks, in the other it floats .-This one test is perfectly conslusive. In the present case every portion of lung thus tested. floated, demonstrating the condition to be that of congestion, and not henatization.

But what was the cause of this congestive condition of the lungs in this case, and how was in produced? We reply, it was a passive congestion, the direct result of paralysis of the respiratory organs. The muscular cost of the blood LAKE SHORE R. R .- CHARGE OF TIME. For vessels, as well as the other muscles concerned convenience, the time table of the Lake Shore in respiration, being in a paralyzed and non-resistant state, the blood flows into the lungs a ing train leaving tale city hereafter, at 7:35 in usual, but they lack the fervor to carry forward the circulation, and the blood accumulates slow- Habers,

All pathologists are familier with this form of passive congestion and the mode of its at all acquainted with diseases of the lungs well production. This congestion, then, as it has been proved to be, is perfectly explicable on the hypothesis of paralysis following the excessive stimulation of the nervous system by strychnins. The post mortem appearances, then, harmonize, as well as the living symptoms, with our hypoth. esis and with no other. The liver and sploan were said to be enlarged, and these enlargements were asserted by Dr Nawman, first, to be the result of a former fever and ague, then of

intemperance. We are informed by those who

knew him that his health was uniformly good,

and even robust, and that, he was never intem-

perata in his habits. But a congested state o

the liver and spicen is perfectly accounted for

on the same principle as that of the lungs, and

confirms its correctness. It is further confirmed

by the state of the whole intestinal canal, which

was largely distended throughout with air, having yielded passively in its paralyzed condition to the distanding force of accumulated gasses. We are now prepared to cabinet the probabil ities of the case to the judgment of all intelligen physicians. It is greatly to be regretted that the examination was wholly neglected in those parts of the body on which the direct effects of strychnine are mainly exerted, caiefly the spine, though even here no effects might be discoverable, for strychnine often produces death by direct action on the norvous system without leaving its mark. Unlike arsenic and other corresive poisons, i seldom leaves any marks upon the stomach. We regret the loose manner in which the whole thing has been conducted. Here is a man coming to ug and with all the symptoms of pois oning by strychnine, and with the symptoms of no other disease. His money and effects are found in the possession of a man who has been his only companion, a large portion of which he has liberally spent and bestowed. The circumstances are, at least, strongly suspicious. And the whole thing is passed over with no more than burlesque of an examination. No part of the body has been examined in which there was the least hope of finding ony evidence, and no inquiry is instituted in regard to the conduct of the suspected man towards the decessed. It such is to be the manner in which auch a suspicious and alarming event is to be passed over, Hoaven defend us against secret assassination, for we

Later from California-Arrival of the Steamer Washington. NEW YORS, Dec. 11.

The steamship Washington arrived this morning on her outward passage. She stopped at Port Royal on the 14th uit. She experienced a heavy gale on the 15th, and on the 16th was boarded by a boat from the U.S. higate Savangah

Col. Childs gives information that nothing had been heard of the Hermann at San Jawa del

go arrough the country, anguing answering fillibusties.

The steamer Catharine Meria was gent up to Gracula to obtain such permission, it the Horman, was at San Juan del Sur.

The Washington was boarded by English officers from the Loopard and Valtynus, with side arms, who saked various questions, as to whether there were arms and ammunicion on board, and appeared to sas the measurement. They were shere were arms and ammunition on board, and requested to see the passengers. They were toold that the eblp had been boarded by an officer of the Savannah, who would give them infortation. They replied they were instructed to obtain such information direct. They did not, however, insist on the hatches being taken off, and they left the ship rather suddenly.

The same day the Leopold went to sea, and went to the miguth of the Coloredo to intercept \$50 filliphington who were said to have ladded the

went to the mouth of the. Colorado to intercept 350 fillibusters who were said to have landed the previous night. Our boost had proceeded to the mouth of the Colorado, and was chased by boats from the Leopold, and as we had to stop to fix the steam pipe, we were overtaken; but finding they were mistaken as to fillibusters being on board, they went back to their ship, which returned to Greytown.

On the 24th Col. Childs, the Cempany's agent, returned from Gransda without accomplishing any arrangement. On the contrary, the boat

returned from Granada without accomplishing any arrangement. On the contrary, the boat was not allowed to pass from San Garlos without an officer and file of soldiers being on board.—
The Government finelity became satisfied that there were no fillibusters on either the Washing ton or the Hermann, and the steamer was permitted to land at Virgin Bay. An agent of the company was also permitted to go to San Juan del Sur, to look after the Hermann.

The Jamestown sailed for Aspinwall on the 22d ult.

22d ul.

The Washington sailed for the same port on the 26th, to send her passengers forward, via Panema. She arrived on the morning of the 28th, in company with the Moses Taylor, No orders having come for the Washington's pas-sengers to go forward by the mail route, they remained on board the Washington, and return-ed to New York, leaving Aspinwall on the evaning of the 21st. Not a case of sickness occurred on board. She left in port the Moses Taylor and Grunada. The Jamestown sailed on the 29th for ban Juan. At Aspinwall she left the store chip Relief. NEW YORK Dec. 11.

New York, Dec. 11.

The Herald's Aspinwal correspondent gives a datalled account of the incidents which occurred at Aspinwall, when it was secretained that Capt. Churchill had not received from the owners, the anticipated orders for forwarding the passengers of the Washington to San Francisco, by the Psnama route, and that he must take them back to New York. The excitement on board was terrible; some proposed sinking the ship, others expressed the wish to knife or hang the owners, and doubtless would have done so had they been present. A meeting was finally called and committees appointed to act in the emergency. In reply to a telegraph derpatch, the Agent of the steamer at Panama agreed to take to San Francisco Euch passengers as could pay, at a greatly secamer at ranking agreed to take to Man Francisco cuto passengers as could pay, at a greatly reduced price. The tare on the read was also reduced. About 200 were able to raise money enough to go forward, on these terms. The remainder, amounting to about 100, were unable to do so, being entirely destitute, and were therefore obliged to raturn in the Washington to New York.

Great distress exists among them. Many of Groat distress calate images them. Many of them are women, who, with their children, were going out to join their bushauds, and who, before leaving the States, had sold everything in order to provide means for their passage. The Directors of the company held a meeting this T. M., to determine what course to pureue. It is stated that the company will send out another stourner to the lethems, also a accord boat around the Hern. The passangers have been of fered board here at the expense of the company until the creamers are ready.

There are later advices at Ransma from South America, including Unico, of the 12th of Nov.

America, including Oclao, of the 12th of Nov., but they are unimportant. Business at Calao dull. Charters inactive. A few ships had been taken to lond Guant for the Maurites. The war with Ecquedor had become quite un-popular, but government was nevertheless mak-ing extensive preparations for its prosecution. Copt. Harriman, of the ship Mary Goodell, died at the Chinese. Mulbourns advices to the 25th of September

are recoived. Business steady. Newand very rich gold mines have been discovered in New such Wales.
The Washington correspondent of the Eveni-Past says the Republican Cancus has filed the blanks in the Committee on Commerce with the names of Hamilin, of Maine, and Chandler of Michigan. Mr. Wilson will be put on the Dis-trict Committee in place of Chandler.

Apprehended Fillibusier Difficulties

Washington, Dec. 11.
The recent escape of filibusters from Mobile The recent escape of filtionsters from Mobile excited intense interest in official quarters, so it is considered that if they should be arrested by the Ethika and other foreign forces, the folunter feeling of this country would be aroused to highest degree of excitement, and immense reinforcements rush to their rescue. Hence a crisis in the foreign relations of our government will be precipitated, and a most angry and invested in the foreign relations of our government between our government and those of Great Britain, France and Spain.

Governments should be ullowed to interfere for the regulation of the affairs upon the American continent, to the prevention of which our gov-ernment is committed. The Union of this mornornancial is committed. The Gramma Cali morning, referring to this subject, says it is to be hoped that our naval vessels may yet succeed in intercepting the fugitive Susan, being her back to our ports, and preserve this fillibuster question still longer as a purely domestic one in our policy. MILWAUKEE:

#### MONDAY MORNING, DECEMBER 13

The Ripon Marriage. News, of Saturday, has a fresh access of intense disgust over the recent marriage at Riron between a colored man and a waite

girl. Hear the News : We agree with our Menasha cotemporary that the act was "abominably ungodly, anti-christian and inhuman," but who is responsible for the stroctous outrage? Manifestly it is those republican prints and oratore, who insisted upon the equality of the negro and white man.

\* \* This outrage upon society is but the natural result of the teachings of our republican politicans. &c. &c.

publican politicans, &c., &c. With much more of the same absurd stuff. Now the facts in this case were published wooks ago, and are perfectly familiar to the News. Rev. Mr. Parsons was arrested and taken to nished his bosom friend, Bennert, of the Herald, Fond du Lac for trial. It appeared, upon examination, that the girl was of age, when the 'coremony was performed; that from her peculiar complexion and hair, the officiating minister took her to be colored; as well as her partner; and that no blame whatever attached to Mr. PARsome. . He was accordingly promptly discharged; with an apology from the magistrate, for having

had bim arrested. So much for the facts. Now as to the News Inference that this "atrocious outrage" is didid know something of Democratic practice, for bo had white blood in his own veins. Very naturally, he followed the customs of the country where he was born and bred, and went in for the same admixture of races which Democracy South largely patronises. It necessarily follows, from all this, that the "atrocious outrage" in question was Democratic in all its phases and in strict conformity with the precepts and practice of Democratic politicishs. There is an obvious propriety, therefore, in the News' disciplining those of its own political household for this "ungodly act." But we protest against its "mixing in" Republicans with the "abomicable business."

Buchanan and Douglas in Virginia At the recent Democratic State Convention in Virginia, after the sharp contest for Governor was over, and Mr. LETORER, who is in the Buchanan interest, had been nominated for Governor, Mr. O. J. Wisk, son of the Governor, editor of the Richmond Enquirer and a loader of the Douglas minority, introduced the following reso-

1. Resolved, That trusting to the patriotism, wisdom and fidelity of the present Chief Magic trate of the Union, and in view of the conduct which has hitherto characterized his direction of which has interest consecutives an a drug, binding on overy true democrat, whatever honest differences may have arisen on isolated questions of public policy, to rally to the support of the Administration, in the name of, and for the sake of, the party whose best interests must remain identified with its own.

Identified with its own.

2. Resolved, That we rejoice unfrignedly in the late victory, so gloriously achieved by the loyal Democracy of Illinois; brethren in the common political faith; we recognize their success as our triumph, and, in common with patriotismen of all sections and all patrios; we find a special cause for congratulation in the defeat of a dangerous sectional organization.

Mr. Wisk stated that he had shown them; to Mr. Wisk stated that he had shown them to owners of the road to pay the interest, and settle some of the leading Lateuar men and that they the boods apon in an additional above terms. wore satisfied with them as a sort of comprehies Hereupon, without much further purley, they were adopted with but for dissorting votes,-After a little; bewever, a Delegate moved to re consider the second resolution, on the ground that it smacked too strongly of Dangelie. The vote was reconsiderd. Another delegate then declared that he regarded the Democratic "vic-

Sham Democracy, is the occasion of intense concent to the organs of that decaying and sectional faction. The News makes plaint over the ciroumstance in this wise :

The republican creed leads directly to negro equality, and in almost every State that party in pledged to abolish all distinction of color in the conferring of political rights, and assabled were conterring of fortical rights, and establish pro-oription on account of birth and religion. And, arrange to observe, these landing are sided in their anarchical designs by a large class; of por-sons of foreign birth, mislead by the sophistry and dopli by of demagogues, would destroy this asylum for opprossed forcemes, and convert it into a second Haytt.

It is precisely because the "large class" of forelgu-born electors, referred to by the News; are too intelligent to be duped by such silly cophistry and idle inventions, as there above put forth, that they do act with the Republicans. They know perfectly well-as do the "damagogues" of the News—that the Republican creed leads to no such results; that the Republican party is nowhere "pledged to establish proscription on account of birth and religion;" and that the rights and interests of adopted citizens have nothing to feer from the triumph of Republican principles. In short, the "bug-bear" of "Know-Nothingiem," with which the News has industrionely endeavored these six or eight years past, to frighten foreignshorn electors into the unites itating support of Sham Democracy, is now threadbare and entirely played out.

THE GREEN BAY ADVOCATE. - The last number of the Green Bay Advocate comes to us in a new and very next dress of type, from the foundry of N. LYMAN, Buffalo. We are unfeignedly gratified at this indication of the Advocate's prosperity. It is emphatically one of the very best papers published in Wisconsin, and its geniel edi tor, Colonel CHARLES D. Romisson, is an orns. ment and an honor to the profession. The "State of Green Bay" ought to make him Governor, next Fall, if the State of Wisconsin does not.

Prepress of the Republicans. A Washington correspondent of the Mont-gomery (Ala) Advertiser, is despondent over his opinion, he has completed the following ta-

change to Republicanism is going on :

"The following table will give the exact numbers of each party in each section, for the same time—the N. column representing the Northern members of the Senate, and the S. column representing the Southern members. The reader will watch the progress of Free Soil Abolition-

CHARAGERRISTIC TRICE OF THE PRESIDENT .-

The New York papers are furious at the discovery that, after promising to treat, them all alike, in the matter of the Message, the President furwith a copy, some hours in advance of the others. The Times lashes Mr. Buchanan unmercifully for this breach of faith. The Tribuns, more temperate, remarks as follows:

The N. Y. Times assails Mr. Buchanan with much warmth, not to say intemperance, of language, for giving a copy of his Message to the Herald in advance of all other journals of the tory beside the pages which record the acts of James Buchanan.

THE BERKS COUNTY VIDIORY .- The election of Gan. Keim in old Borks County is even a more cutting rebuke to the Administration, and a more decided Republican triumph than we have been disposed to claim. We now have the authority of the Philadelphia Pennsylvanian for stating that he is not only an opponent of the Administration, but an out and out Black Repub-

llean. That paper says: lican. That paper says:

"He has been a life long and consistent opponent of Demogratic men and measures. He was nominated by the opposition, ran as their candidate, the exponent and defender of their principles, and the bitterest antagonist of every doctrine of the Democratic party. He does not differ with the party alone on the Kansas policy of Mr. Buchanan, which was the only point the opponents of Mr. Jones affected to antagonize the national organization upon. Gen. Keim is a full feathered Black Republican, and stands bested Soward on the Rochester Platform."

ASSUMPTION AMONG THE FARM-MORTGAGORS.~ k meeting of the farm mortgagors and steckholders of the La Crosse railroad, was held in Burnett, Dadge county, on the 2d lest, when the following resolutions were unanimously adep-

ted:

Gecen Bay Advocate, writing from Stike, Oconto county, gives an account of a fital accident, which occurred in that place on the first inst.

A party of men went from Eldrad & Balcolm's mills to cutout a road, and after arriving at their place of labar they made a fife. During the toroneon, a tree was felled from the road, which ory" in Illinois as the rain of the second ory in Illinois as the rain of the rain of the resolution. Mr. Where storily defended it, but in resolution. Mr. Where storily defended it, but in their dinner, sealing themselves around the resolution. The assembled concerned of Virginia had discovered the colored gentleman, in the tence and the resolution was "no go." A motion to by it en the table was carried by an almost unanimous vote. Good Naws from Indiana—The Senatorial Election Bill, (fifer an extended discussion, which is reported by our Indianapolis correspondent) passed the Indiana Soonte, pasterday, by a vote of 26 to 21.—There is little doubt that the Hours will content. The next step will be the election of two bons fide Senators, in place of Bright and Fitch, the naurgers. The question will thus be fairly varied in the United States Senate, and in a way that will compel a deliber as a consummation the Lecomptonics have been moving heaven and earth to prevent; and which they greatly dread,—Cincinnati Odzette, Dec. 9.

The plan is said to be one for restoring credit to the people of the State. The limitation of State indobtedness by the Constitution, has had the effect to keep the State credit in the limitation of the state credit in the limitation of the land of the at the bigbest point in market; a like limitation on the part of individuals and cities would likely have a similar effect. I think the present State policy is more worthy of limitation than that of policy is more worthy of imitation than that of the individuals and corporations, who seek to change circumstances with the State. The towns and cities that have loaned their credit in large amounts, have done so as a matter of speculation, winh the belief that their town property would rise in value in consequence of the build ing of the Roads. The results prove that they were correct in their views. I think that the projectors of this Assumption scheme will admit that their town property has risen in value in consequence of the building of these Roads, ave times the amount of their liabilities incorred for that purpose. The epeculation was a good one for them, and a small portion on the advance of their property would pay the debt.

It is claimed that it is morally right for the State to assume this debt. I think the State or any able capitalist would be willing to do so, could they have one half the rise on real estate.—Sparta Herald, Dec. 9. that these debters have realized out of this same transaction. But the State in its corporate can pacity is not the proper party to conduct such enterprises. Their powers in this respect are to which the delicate form of woman are subject. Much is said about taxing roil roads. I think they are taxed the same as other property .-Excessive partial taxation would probably require the consent of two parties. Should the State take the roads into their own hands, the amount they would have to pay would be about thirty millions. This would call for a State tax of two millions, annually, above our present State tax .-Who shall say that the roads under the management of appointers of the State would pay running expenses and repairs? With a scheme of this kind adopted, our taxes would be greater than the whole rent of our taxable property .--Hence where is the success of your sobeme in restoring credit to the people of the State? ## WEEKLY MARKET REVIEW.

General business may now be considered as having settled down quietly for the winter, and we need not expect much animation in any department of trade until the opening of the spring business. Our merchants are enerally more busy than they found themsalves at the generally more dury than type forms as the pro-duce and provision markets are concerned, a comparison shows, to say the least, a fair improvement in favor of the present season. Navigation may be said to be completey closed, with the exception of the Ferry across the Lake sonnecting with the Detroit and Milwaukee Railway, year. There is a large number of vessels hald up here for the winter. The losses sustained by marine disasters, s far as relates to this port, have been comparatively our shippers on their good luck, for the season has been an extremely unprofitable out, low rates and light car-

Total exports of grain for the season .. 6,007,367 The following statement shows the comparative prices of leading articles, last year and this: 

In the markets there has been very little dene since the date of our last, outside of the pork trade, which has been quite brisk indeed, with considerably increased ro ceipts of dressed hogy. The receipts of whest show a failing of of about 50 per cent, of four the decrease is not so great, of outs they are about one half, of coin will lets, as of barley and ye also, of hides and, most other

In the prices of grain there is little variation, with the exception of wheat, which, on account of the small amonn t on the market, has advanced somewhat, clesing firm at our quototions. The range for No. 1 spring has been 73a7bc, good samples going freely at the outside figure, the supply being much less than the demand.— Milling wheat has also been firm and under the influence of a lively competition prices have advanced lafe. We note a more buryant feeling in the flour market, with moderate transactions and as advance of about 12% on spring extras. Barley has sold at the same figures generally, as has also rye and core, both being a trifle firm-er. The supply of cats is not anifolient for the local de-mand, and prices remain firm with rather an opward according to quality. Prices of butter are a shade low-

er, in consequence of an increased supply. With increased receipts of dressed hogs we note a de olded improvement in the pork market, the sales showing an advance of full 50c per 100 lbs, over those of last work. to-day , as compared with last Saturday:
